ABOUT UNIQUE INSPECTION

Independent Inspection for a Safer, Stronger Tomorrow.

1. ABOUT US

Unique Inspection Integrated Services is an independent inspection services provider committed to quality, safety and compliance. We support clients across Oil & Gas, Petrochemical, Power, Water, Infrastructure and Industrial sectors through reliable third-party inspection, vendor surveillance, verification, audit, expediting and technical support services.

"Inspect Today for a Safer Tomorrow"

2. WHY CHOOSE UNIQUE INSPECTION?

- Independent & Unbiased Inspection
- Experienced and Qualified Engineers
- Focus on Quality, Safety and Compliance
- On-Time Reporting and Communication
- Support Across Saudi Arabia and International Standards
- Client-Centric and Value-Driven Approach

3. CORE VALUES

- INTEGRITY
- PROFESSIONALISM
- RELIABILITY
- VALUE

4. INDUSTRIES WE SERVE

- OIL & GAS
- PETROCHEMICAL
- POWER & UTILITIES
- WATER & INFRASTRUCTURE
- INDUSTRIAL & CONSTRUCTION

Your Trusted Partner for a Safer and Better Tomorrow

VISION

To be **Globally** the most trusted and leading partner cum performer in inspection, verification and audit industry with the passion of **customer centric tailored services.**

MISSION

As a **Customer Centric Company**, we maximize added value and meet stakeholder's expectations by:

- Being reliable and executing best practices in Inspection, Verification and Audit Industry.
- Conforming to the highest safety, health, environment and quality standards.
- Conducting business with competence in an ethical, responsible and accountable manner.
- Synergize with our customers to build productive, collaborative and trusting relationships.

QUALITY POLICY

Our **Quality Policy** is defined and strongly driven by the following management principles and behaviors:

- Build a mutually profitable relationship with our customers, ensuring their long-term success.
- Achieve our commitments for quality, cost and schedule.
- Enhance the systematic research and use of best preventive practices at all levels and ensure reliable risk management.
- Drive continual improvement and innovation based upon efficient business processes, well-defined measurements, best practices and customer surveys.

"Reliable **Inspection** at Every Stage

VENDOR INSPECTION DEPARTMENT (VID)

Vendor inspection, also known as third-party inspection, is performed at manufacturer, vendor and sub-vendor facilities on behalf of the client to verify that products are manufactured in accordance with approved requirements, applicable codes, standards and project specifications.

Vendor inspection plays a critical role in supporting project quality, schedule and safety goals. Based on client requirements, approved engineers perform inspection at various stages of production before, during and after manufacturing, in line with approved ITPs and procedures.

TYPICAL INSPECTION STAGES

01 Kick-off Meeting → 02 Pre-Inspection Meeting → 03 Document Review → 04 Raw Material / Incoming Material Inspection → 05 In-Process Inspection → 06 Final Inspection → 07 Final Acceptance Test → 08 Final Release → 09 Pre-Shipment Inspection → 10 Marking, Packing and Loading Verification

KEY BENEFITS

- Independent third-party assurance
- Verification of compliance with client requirements
- Improved quality and traceability
- Reduced risk of delays and non-conformities
- Clear electronic reporting and communication
- Support for timely release and shipment

INSPECTION COVERAGE

Qualified Inspection Support Across Critical Commodities

HEAT EXCHANGER INSPECTION

Mechanical Equipment (Static & Rotating Machinery)

- Pressure Vessels
- Tanks
- Heat Exchangers
- Columns
- Boilers
- Structural Steel
- Line Pipe
- Fabricated Pipe
- Bends, Valves, Flanges and Fittings
- Skids
- RTR / GRE / GRP Pipes and Fittings
- Pumps, Compressors, Turbines, Motors and Rotating Equipment

Coatings Inspection

Critical and non-critical coating inspection for FBE and liquid coating systems on line pipes, fabricated piping, bends, flanges, fittings, structural steel, offshore platforms and mechanical equipment in accordance with applicable specifications, drawings and manufacturer recommendations.

- Surface Preparation
- Environmental Checks
- DFT (µm)
- Holiday Test
- Coating Repair
- Final Release

DFT COATING INSPECTION

FBE / GRP PIPE INSPECTION

Electrical & Instrumentation

- Alarm Systems
- Cables
- Control Panels
- Current / Voltage Regulators
- Motors
- Motor Control Centers
- Rectifiers
- Switchgears
- Transformers
- UPS Systems

ELECTRICAL & INSTRUMENTATION INSPECTION

VENDOR EXPEDITING DEPARTMENT (VED)

Expediting is a project support function used to secure the quality and timely delivery of goods and components. It monitors manufacturing progress, quality status, packing readiness, conformity with standards and schedule commitments.

Unique Inspection's expediting team helps clients ensure purchased goods are delivered on the planned date, in the agreed quality and at the agreed location. Services may include field expediting, desk expediting, schedule follow-up, progress reporting and supplier coordination.

Expediting Support Includes

- Manufacturing Progress Monitoring
- Quality Status Follow-up
- Documentation & Schedule Review
- Packing Readiness Verification
- Supplier Coordination
- Field and Desk Expediting
- Delivery Status Reporting

OUR SERVICES FOR A SAFER STRONGER TOMORROW

INDUSTRIAL EXCELLENCE THROUGH TRUSTED INSPECTION

PROJECT & TECHNICAL SUPPORT SERVICES

— Site Inspection, Vendor Audit and Skilled Resource Support

PROJECT INSPECTION DEPARTMENT (PID)

Project inspection involves inspection of materials, equipment and systems at site during construction, installation, pre-commissioning and final acceptance. It supports quality assurance from receipt of materials through installation and commissioning.

Typical project inspection activities include incoming material inspection, mechanical equipment and components inspection, pressure gauges and relief valves, pipe and piping components, welding, coating and NDT inspection, and electrical and instrumentation equipment verification.

PID SCOPE

- Incoming Material Inspection
- Mechanical Equipment & Components
- Pressure Gauges & Relief Valves
- Pipe & Piping Components
- Welding, Coating & NDT Inspection
- Electrical & Instrumentation Equipment
- Installation / Pre-Commissioning Verification

QUALITY AT EVERY STAGE OF YOUR PROJECT

VENDOR SURVEY AND AUDIT (VSA)

Unique Inspection performs supplier and factory audits to assess whether vendors have the capability, facilities, quality systems and resources required to deliver products in the right quality and within the required time frame.

The audit scope may include company existence and reputation checks, ISO certification and quality management system review, production capacity assessment, document availability, worker conditions, and overall facility reliability.

AUDIT FOCUS AREAS

- Capability & Capacity
- Quality Management System
- Certifications & Documents
- Facility & Production Control
- Workforce & Working Conditions
- Delivery Reliability

STRONGER SUPPLIERS A STRONGER TOMORROW

PROFESSIONAL AND EXPERTISE SUPPLY (PES)

Unique Inspection provides qualified technical manpower and recruitment support across K.S.A., supplying experienced professionals and skilled personnel for short, medium and long-term project requirements.

- Project Managers
- Project Engineers
- Quality Inspectors
- Drilling Specialists
- Offshore & Onshore Specialists
- IT Professionals
- Auditors and Technicians
- E&I Specialists
- Machinery Operators
- Administration Staff
- Equipment Operators
- Heavy & Light Drivers

"From Site Inspection to Resource Support"

OUR SUPPORT DELIVERS REAL VALUE

- Reliable field verification
- Better supplier qualification
- Skilled personnel mobilization
- Improved project coordination
- Timely reporting and communication

INSPECTION EXCELLENCE FOR A SAFER TOMORROW

NDT SUPPORT SERVICES (NSS)

Advanced Nondestructive Testing Support for Quality, Integrity and Reliability

Unique Inspection provides critical NDT solutions and full-scope NDT support services to contractors, fabricators and industrial clients. Nondestructive testing (NDT) is the process of inspecting, testing or evaluating materials, components and assemblies for discontinuities or differences in characteristics without destroying the serviceability of the part or system.

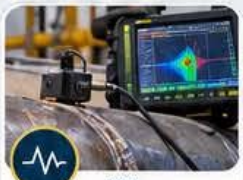

Today, modern NDT methods are used during manufacturing, fabrication, construction and in-service inspection to ensure product integrity and reliability, control quality, reduce production risks and maintain a consistent quality level throughout the project lifecycle.

PEOPLE TECHNOLOGY EXPERIENCE FOR A STRONGER TOMORROW

SERVICES OFFERED

- NDT procedure preparation, review and approval support
- Training and certification support for Level II inspectors as per ASNT TC-1A / CP-189 guidance
- Level III consulting services
- Inspection planning and technical coordination
- Reporting and documentation support
- Support during fabrication, construction and in-service inspection

COMMON NDT METHODS

UNIQUE INSPECTION
INTEGRATED SERVICES

INSPECT | ASSURE | DELIVER | ADD VALUE

From Inspection Request to Project Success

INSPECTION EXECUTION & REPORTING WORKFLOW

A STRUCTURED PROCESS FOR RELIABLE, TRANSPARENT AND TIMELY INSPECTION SERVICES

01 INSPECTION REQUEST / NOI

Receive client inquiry, NOI and project requirements.

02 SCOPE & DOCUMENT REVIEW

Review ITP, drawings, standards, specifications and client requirements.

03 INSPECTOR ASSIGNMENT

Assign qualified and experienced inspector(s) as per scope and location.

04 PRE-INSPECTION PREPARATION

Ensure all documents, checklists, tools, calibration and safety readiness.

05 SITE / VENDOR INSPECTION

Conduct inspection as per ITP, standards and applicable codes.

06 WITNESS & HOLD POINTS

Witness, verify and document hold/witness points as per ITP.

07 FINDINGS / NCR / PUNCH LIST

Raise findings, NCR or punch list for non-conformities (if any).

08 CORRECTIVE ACTION VERIFICATION

Verify corrective actions, re-inspection and closure.

09 FINAL INSPECTION & ACCEPTANCE

Ensure all requirements are fulfilled and material equipment are acceptable.

10 INSPECTION REPORT

Issue detailed inspection report with photographs, results and status.

11 RELEASE / CLIENT CLEARANCE

Support client for final release, shipment clearance and project completion.

WHAT THE CLIENT RECEIVES

COMPREHENSIVE, WELL-STRUCTURED AND TIMELY DELIVERABLES

- Inspection Reports
- High-Resolution Photographs
- Punch List & NCR Status
- Document Review Comments
- Daily / Weekly Progress Updates
- Material Release Recommendation
- Closing Report & Compliance Status
- Complete Dossier Support
- Digital Copy (As Required)
- Direct Communication with Client

KEY BENEFITS FOR OUR CLIENTS

- CLEAR & TRANSPARENT PROCESS
- TIMELY INFORMATION
- REDUCED RISK OF NON-CONFORMITY
- BETTER QUALITY ASSURANCE
- ON-TIME PROJECT EXECUTION
- TRUSTED INDEPENDENT PARTNER
- LONG-TERM VALUE AND RELIABILITY

Technical Expertise Across Industries

TECHNICAL COMPETENCE YOU CAN RELY ON

MULTI-DISCIPLINE EXPERTISE, INTERNATIONAL STANDARDS, QUALIFIED PROFESSIONALS

1 OUR TECHNICAL DISCIPLINES

COVERING A WIDE RANGE OF EQUIPMENT, MATERIALS AND PROJECT REQUIREMENTS

Mechanical Equipment

Pressure vessels, tanks, heat exchangers, columns, boilers

Piping & Pipeline

Carbon steel, stainless steel, alloy, CRA, spools, fabrication & erection

Valves & Flow Control

Gate, globe, check, ball, butterfly valves, actuators

GRE / GRP Piping & Fittings

Pipes, fittings, sleeves, flanges, dismantling joints

Coating & Painting

Surface preparation, coating application, DFT measurement

Structural Steel

Fabrication, welding, dimensional check, bolted structure

Electrical Equipment

LV/MV switchgear, panels, motors, transformers

Instrumentation

Transmitters, gauges, analyzers, control valves, loop check

Rotating Equipment

Pumps, compressors, gearboxes, turbines, alignment check

Materials & Special Processes

Raw materials, castings, forgings, rubber lining, cladding and more

2 CODES & STANDARDS FAMILIARITY

WE WORK AS PER INTERNATIONAL STANDARDS, CLIENT SPECIFICATIONS AND PROJECT REQUIREMENTS

ASME	API	ASTM	AWS	ISO	ASNT	AMPP	IEC	EN	EN	Client Specifications
Boiler & Pressure Vessel Codes	Piping, Equipment, Inspection Standards	Materials & Testing Standards	Welding Standards	Management & Technical Standards	NDT Standards	Coating & Corrosion Standards	Electrical & Instrumentation	European Standards	(ARAMCO, SABIC etc.)	

3 INSPECTOR QUALIFICATIONS & APPROVALS

COMPETENT, EXPERIENCED AND CLIENT-APPROVED INSPECTORS

CSWIP 3.1 Welding Inspector	ASNT NDT Level II / III	API Inspector (API 510/570/653 etc.)	AMPP / NACE Coating Inspector (LEVEL II)	Client Approved Inspectors (Aramco, SABIC etc.)	Experienced Multidiscipline Team

- Relevant certifications
- Industry experience
- Client-specific training
- HSE awareness
- Continuous professional development
